

How food delivery works at [property name]

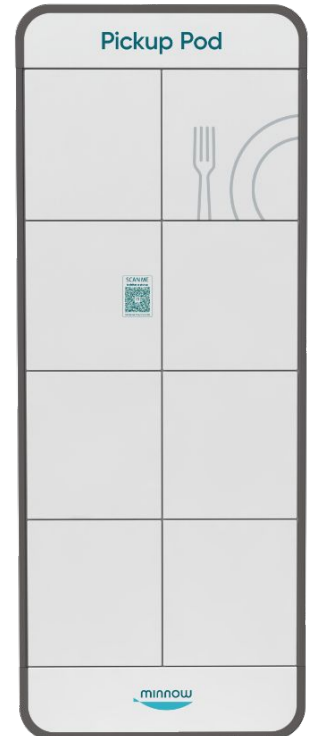

All restaurant deliveries go to the Pickup Pod, which makes food delivery safe, secure, and convenient. Instead of meeting the delivery person face-to-face, you can pick up your food when it's convenient.

IMPORTANT!

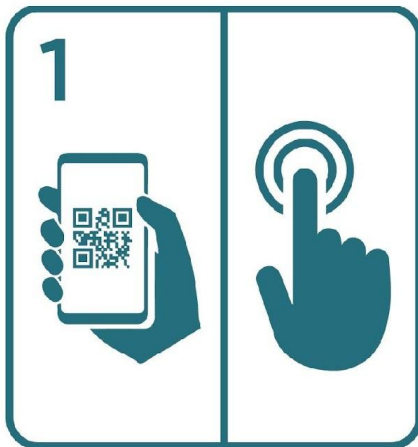

To use the Pickup Pod, you must update the delivery instructions in your food delivery app.

Log in to the app, go to your profile, and paste this text into the delivery instructions box:

Please deliver to the food locker located [Pod Location].

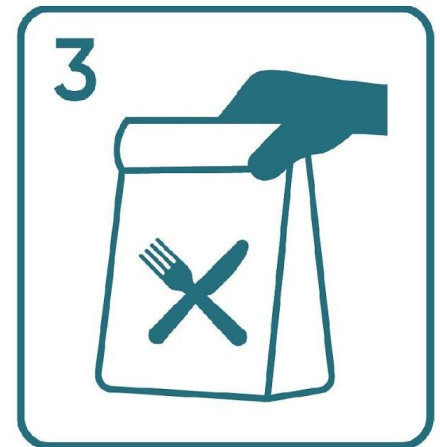

How to use the Pickup Pod

1
Scan the QR code or use the touchscreen to access the Pickup Pod

2
Follow the instructions on the display

3
Remove your order from the cubby. Don't forget to close the door

Food Safety Notice

The Pickup Pod is insulated to help maintain freshness, but is not heated or refrigerated. The Center for Disease Control & Prevention recommends that food be consumed within 2 hours of preparation (or 1 hour if it is 90F or warmer outside) To learn more, visit [CDC.gov](https://www.cdc.gov)
